COMPANY PROFILE

Happy Camp was established in 2015, a professional intelligent prefab house manufacturing company. The company's core value is technological innovation and advanced with times. Implementing with sustainable development of environmental protection concept, Happy Camp is dedicated to creating a new style of prefab house which is more fashionable, more comfortable and more suitable for outdoor accommodation.

High production

The company has a 60000 square meter production workshop, and has a number of technology patents. With a complete set of automated production equipment, the monthly production capacity is up to 300+set .

Professional design

Happy camp with it's own designer and it's own R&D team, the prefab house is full of high-tech, and high-quality. At the same time, Happy camp will continually improve the manufacturing technology and offer new product to meet the need of customers.

Intelligent innovation

With more intelligent control and more comfortable, the prefab house bring a more harmonious way of living with nature. Furthermore, energy saving and emission reduction.

Environmental protection

Camping has become more and more popular, the intelligent prefab house is the new favorite. It's a well finished product, easy to set up just by connecting water and electricity. Saving time and without destroying environment.

Widely used

Happy Camp have shipped to many countries and regions, and highly favored by the customers.

Happy Camp , your best companion for exploring nature.
